## Annex B

# Water Quality Monitoring Results

Table B1 Action and Limit Levels of Water Quality for Dredging, Disposal and Capping Activities at ESC CMP V

| Parameter                                 | Action Level                                                   | Limit Level                                                    |  |  |  |  |
|-------------------------------------------|----------------------------------------------------------------|----------------------------------------------------------------|--|--|--|--|
| Dissolved Oxygen (DO) (1)                 | Surface and Mid-depth (2)                                      | Surface and Mid-depth (2)                                      |  |  |  |  |
|                                           | 5%-ile of baseline data for surface and                        | 1%-ile of baseline data for surface and                        |  |  |  |  |
|                                           | middle layer = $3.76 \text{ mg L}^{-1}$                        | middle layer = 3.11 mg $L^{-1}$ (3)                            |  |  |  |  |
|                                           | and                                                            | and                                                            |  |  |  |  |
|                                           | Significantly less than the reference                          | Significantly less than the reference                          |  |  |  |  |
|                                           | stations mean DO (at the same tide of                          | stations mean DO (at the same tide of                          |  |  |  |  |
|                                           | the same day)                                                  | the same day)                                                  |  |  |  |  |
|                                           | Bottom                                                         | Bottom                                                         |  |  |  |  |
|                                           | 5%-ile of baseline data for bottom                             | The average of the impact station                              |  |  |  |  |
|                                           | layers = <b>2.96 mg L</b> -1                                   | readings are <2 mg/L-1                                         |  |  |  |  |
|                                           | and                                                            | and                                                            |  |  |  |  |
|                                           | Significantly less than the reference                          | Significantly less than the reference                          |  |  |  |  |
|                                           | stations mean DO (at the same tide of                          | stations mean DO (at the same tide of                          |  |  |  |  |
|                                           | the same day)                                                  | the same day)                                                  |  |  |  |  |
| Depth-averaged Suspended                  | 95%-ile of baseline data for depth                             | 99%-ile of baseline data for depth                             |  |  |  |  |
| Solids (SS) (4) (5)                       | average = 37.88 mg L-1                                         | average = <b>61.92 mg</b> L-1                                  |  |  |  |  |
|                                           | and                                                            | 1                                                              |  |  |  |  |
|                                           | 120% of control station's SS at the same                       | and 130% of control station's SS at the same                   |  |  |  |  |
|                                           | tide of the same day                                           | tide of the same day                                           |  |  |  |  |
|                                           | tide of the same day                                           | tide of the same day                                           |  |  |  |  |
| Depth-averaged Turbidity<br>(Tby) (4) (5) | 95%-ile of baseline data = <b>28.14 NTU</b>                    | 99%-ile of baseline data = <b>38.32 NTU</b>                    |  |  |  |  |
|                                           | and                                                            | and                                                            |  |  |  |  |
|                                           | 120% of control station's Tby at the same tide of the same day | 130% of control station's Tby at the same tide of the same day |  |  |  |  |

### Notes:

- (1) For DO, non-compliance of the water quality limits occurs when monitoring result is lower than the limits.
- (2) The Action and Limit Levels for DO for Surface & Middle layers were calculated from the combined pool of baseline surface layer data and baseline middle layer data.
- (3) Given the Action Level for DO for Surface & Middle layers has already been lower than 4 mg L<sup>-1</sup>, it is proposed to set the Limit Level at 3.11 mg L<sup>-1</sup> which is the first percentile of the baseline data.
- (4) "Depth-averaged" is calculated by taking the arithmetic means of reading of all three depths.
- (5) For turbidity and SS, non-compliance of the water quality limits occurs when monitoring result is higher than the limits.

Table B2 Water Column Profiling Results for ESC CMP Vd in October 2019

| Stations            | Temp  | Salinity     | Turbidity | Dissolved | l Oxygen | pН      | Suspended<br>Solids |  |
|---------------------|-------|--------------|-----------|-----------|----------|---------|---------------------|--|
|                     | (°C)  | (ppt)        | (NTU)     | (%)       | (mg L-1) |         | (mg L-1)            |  |
| WCP 1 (Downstream)  | 29.17 | 28.27        | 8.10      | 89.08     | 5.84     | 7.89    | 7.8                 |  |
| WCP 2<br>(Upstream) | 29.13 | 28.29        | 8.88      | 87.14     | 5.72     | 7.86    | 8.5                 |  |
| WQO (Wet<br>Season) | N/A   | 25.45-31.11# | N/A       | N/A       | >4       | 6.5-8.5 | 10.8                |  |

#### Note:

Cell shaded yellow / red indicate value exceeding the Action/Limit levels.

Cell shaded grey indicate value exceeding the WQO.

Table B3 In-situ Monitoring Results for Routine Water Quality Monitoring of ESC CMPs in October 2019

| Sampling<br>Period | Stations           | Temp  | Salinity     | Turbidity | Dissolve | pН       |          |
